Place this kind, literary person in a court ruled over by an absolute monarch. Surrounded by political intrigue, moral corruption, pretentiousness, fickle power and every vice you can imagine, how is such a man to stay honest and survive? This is the situation in which we find Jean de La Fontaine, gentleman, in the mid-17th-century court circles of Louis XIV. Antonia</div>

Even so, a wrong word or a suspicious friendship could quickly lead to a fall from royal favor and a lifetime in some dark dungeon. One of La Fontaine's patrons had already gone down that path, suspected of diverting funds from the royal treasury. La Fontaine was too honest to pretend that the world around him was just fine. So he turned to the classics, eastern and western, and to French storytellers like Rabelais, for inspiration - and reinvented the fabulous art of fables. Throughout history, fables - and animal fables in particular - have had a close link with kings, courts and the exercise of absolute power. It seems that wise and sensible people, when asked for guidance by powerful rulers, are too clever to be straightforward. Even among his closest acquaintances, La Fontaine was always, if nothing else, subtle; it was said of him that he never spoke his mind. What he did do, however, was let animals speak for him, and it is through them that we discover the genius and spirit of the man. In La Fontaine's world of fables, the lion is royal and domineering, the eagle haughty and severe, the rat scheming, the fox devious, the cat deceitful, the wolf savage and wild, the ass empty-headed, the heron fussy and disdainful. This storytelling device allowed him to speak his mind about society at large without upsetting anyone important. The real object of his wit and satire, of course, was the human race, and the heart of his method, as he says, was "to ridicule human vices." As for his targets, they ranged from the humblest peasant to the mightiest of lords. His lion was a thinly disguised portrait of Louis XIV himself, who never quite	Registration Effective Date	Registration Number	Secondary Registration Effective Date	Secondary Registration Numbers	Tertiary Registration Numbers

He had little patience with pedants, rascals or deceivers, the miserly, mean or hypocritical. Neither churchmen nor lawyers escaped his barbs. Equally he had no time for the simple or gullible who bring misfortune upon themselves. La Fontaine mentions his debt to an "Indian sage," his source a collection of ancient Sanskrit fables which passed into Persian and Arabic and later spread around Europe in translation. How the original oriental fables came to be written is yet another story of court life. An Indian king in the fourth or fifth century AD had three young sons who drove their tutors to despair with their lack of learning. The king asked his chancellor to come up with a solution, as he had no wish to pass on his kingdom to such unreliable successors. The wise man had the diplomatic idea of teaching the princes through animal fables, and it seems that the strategy worked. The young royals grew up to be wise and good rulers, and the chancellor flourished. The book of fables became known as the Panchatantra, or Five Discourses. In its Arabic version, Kalila and Dimna - exemplary tales told by two jackals - this classic text spread throughout the Middle East, and was once required reading for career civil servants. Both Aesop, the supposed creator of many Greek fables, and Phaedrus in first-century Rome, were slaves who owed their survival in high places to their fable-telling. Aesop found honor in the court of Croesus, the famed king of Lydia. Phaedrus, penning verses in the imperial household, survived the reigns of the infamous Tiberius and Caligula.
